

### Fiver Challenge

On Tuesday afternoon, the front playground was awash with stalls as it was the culmination of Year 6's participation in the Young Enterprise's Fiver Challenge, where each pupil was given a £5 loan to put together a stall, with any profit being put towards their trip at the end of term.

The children thoroughly enjoyed planning and delivering their ideas to the rest of the school and their families, and they raised over £200!

Thank you to all those people who supported the children in this endeavour. Keep your eyes peeled for Weyfield's future entrepreneurs.

### Science in the Park

Pine and Willow classes made the most of the glorious weather last week, visiting Stoke Park and taking the opportunity to test their home-made vessels for buoyancy. Archimedes would, we are sure, be pleased to learn that his Principle still held true!

### Metro Bank

Year 4 are beginning to learn about finance, saving and budgeting, as this week they had their first visit from Kas and Kate

From Metro Bank. They discovered the difference between credit and debit cards, what interest is, and they learnt all about safety deposit boxes. They are very much looking forward to their forthcoming trip to the bank, where they will have the opportunity to use the *Magic Money Machine* and go into the vault!

### Gatwick Aviation Museum

Years 1, 2 and 3 paid a visit to the Gatwick Aviation Museum, where (after some transport problems of their own!) they saw some unique examples of British aircraft, including Gloster, De Havilland and Hawker planes. They even went on the Avro Shackleton and caught a glimpse of the world's largest passenger plane, the A380. As you would expect, the children's behaviour was exemplary, and commended by the staff and volunteers at the museum.

### Tuesley Farm

Maple Class were lucky enough to be able to visit Tuesley Farm in Godalming on Friday, where they saw the packing room and were able to check the fruit was being kept at the correct (very cold!) temperature before heading out to the fruit fields to pick their own strawberries, raspberries and blueberries. At this time of year, workers pick 800,000 strawberries, 750,000 blueberries and 600,000 raspberries **every day!** All of these are packed and sent out to stores within a few hours. The children thoroughly enjoyed their day and we are sure their families enjoyed the fruit they brought home.
